# **SAFETY AUDIT**

Certified Playland Compliance & Maintenance Safety Audit to NZS5828:2015

#### **PLAYLAND INSPECTION**

It is imperative that your playland is inspected and maintained to the requirements of the NZS:5828:2015 which ensures your obligations to Health & Safety.

A certified audit provides a comprehensive inspection of your playland area by a certified RPII Inspector and ensures that any issues that could present an undue risk of injury to users are identified and reported.

Typically many of these risks can be easily remedied provided they are correctly identified.

This is an useful practical working document ideal for manages/ owners to identify any current issues before breakage or potential injury and highlight any future maintenance and remedial repairs required.

#### WHAT'S INCLUDED

Certified Playland Safety and Compliance Inspection and Report

The comprehensive Playground Inspection establishes the overall level of safety and compliance, structural stability and surface condition for falling.

Our Inspectors are trained & certified to inspect and provide a comprehensive report to the RPII Register of Play Inspectors International, partnered with ROSPA Royal Society for the prevention of accidents.

Our comprehensive inspection report consists of all play equipment and surfacing onsite, followed by an electronic report that includes photos, risk assessment and recommendations for every finding.

The inspection report includes:

- ✓ NZS:5828 / EN1176 Compliance Assessment
- Annual Main Inspection as per NZS5828:2015
- Entrapment Probes (head, neck, torso, leg & fingers)
- ✓ Fallzones, free height of fall, falling & freespace
- Photos, Risk Assessment and Recommendations
- General Health and Safety Hazards
- Wear and Tear / Sacrificial Parts
- ✓ Structural Stability
- ✓ Inspection of Play Equipment
- Inspection of Safety Surface
- Emergency & fire safety management
- Accessibility, visibility & Evacuation
